

Table 2. Prevalence rates of the different thyroid hormonal patterns and median (range) serum levels of thyroid peroxidase (TPOAbs) and thyroglobulin autoantibodies (TGAb) at diagnosis of Hashimoto’s thyroiditis (HT) in the 2 groups of HT children, with (group A) or without Down’s syndrome (group B)

	Euthyroidism n (%)	Subclinical Hypothyroidism n (%)	Overt Hypothyroidism n (%)	Hyperthyroidism n (%)	TPOAbs IU/ml	TGAb IU/ml
Group A (146 patients)	20 (13.7)	92 (63.0)	28 (19.2)	6 (4.1)	83 (0.2–4045)	100 (0–3673)
Group B (553 patients)	300 (54.3)	95 (17.2)	122 (22.1)	36 (6.5)	554 (22–4600)	237 (0–3536)
p-value	<0.001*	<0.001*	0.450*	0.278*	<0.001 [§]	<0.001 [§]

*Chi-square test; [§]Mann Whitney U test.
